

## **IDT Safeguard Identity Theft Protection & Resolution Services Program**

### **Summary:**

Identity theft is a serious, fast-growing crime. It claims new victims every two seconds. Over 12.7 million consumers fell victim to identity fraud last year—19 people every minute—taking an estimated 14-16 months to clear their names. Seniors are 34% more likely victims of identity fraud than at age 40. Revenue from ID theft surpassed revenue from drug trafficking in the U.S; credit card theft alone cost Americans more than \$9 billion.

Identity theft involves any misuse of another individual's information including:

- Sensitive information to fraudulently open credit accounts, use existing credit and banking assets, and even seek medical treatment.
- Personally identifiable information (PII), Social Security numbers, financial account numbers, protected health information (PHI). PII and PHI that can be exposed in many ways—intentionally and unintentionally—including through human error, data theft, and hacking attacks on computing devices.
